Meet our experts:

Microservices without Servers,
Monday, 2:55 p.m. – 3:45 p.m.
Seacliff D

Speaker: Jonathan Kaufman, Developer Advocate for IBM Emerging Technology

In this session, developers will learn how to build microservices without servers, using modern “serverless” cloud platforms. We’ll look at common challenges (and solutions) to building applications using “serverless” stacks. Exploring emerging “serverless” design patterns will give developers the knowledge to build application architectures using these new platforms.

Day in the Life with Speech Recognition, Machine Learning, and IOT,
Wednesday, November 9th, 10:35 a.m. – 11:25 a.m.
Seacliff D

Speaker: Mark VanderWiele, Distinguished Engineer, Emerging Technology, IBM Cloud

In this talk we explore how to increase our efficiency using the capacity of cognitive computing and machine learning to synthesize and analyze the evolving patterns in life and the interactions of our everyday activities, including our business information, our schedules and our search and tracking habits for information.
