Teachers

Failed Attempts

- Pairing 1 hr per week, ½ day per week
- Still have your own work to get done
- No way to capture contributions or credit the pair
- Pair didn't want to pair with you
- It's faster by yourself
- Silent treatment

Pair Programming is hard

@nerdneha
#furtherpairingtogether
#qconsf

Goals

1. Failed Attempts
- 2. Pairing @ Pivotal Labs**
3. Pair Programming & You
4. Good times
5. War Stories

Cultural Tenets at Pivotal

Do what works

Do the right thing

Be kind

Pivotal Labs: Setup

Client

Pivotal

Pivotal Labs: Setup

Team

We rotate pairs

Every day

More pairs means more possible pairings

We rotate pairs

Every day

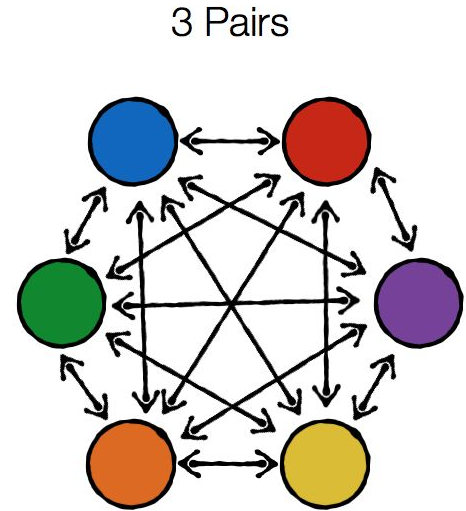

More pairs means more possible pairings

1 Pairing

3 Pairings

15 Pairings

What's particularly unique about our culture

Pivots are well-equipped and willing to:

- Be vulnerable
- Be fearless
- Go slower in the short term for long term gain
- Trust that others will do the right thing
- Eliminate code and emotional silos
- Do the right thing for the team

How did we build this culture?

- TDD
- Set Schedule
- Retros & Feedback loops
- Well-written stories
- Fewer meetings
- Hiring for good pairs
- CI & CD
- Taking our Mission seriously

The big picture at Pivotal Labs

Test Driven Development

@nerdneha
#furtherpairingtogether
#qconsf

TDD & Pairing

**It's easier to agree on a
test than it is to agree
on an implementation**

TDD + Pairing allows for balance and avoids fights

Easier to agree on a test

Go with the simplest implementation

Red, Green, Refactor

No pull requests/judgement day!

The big picture at Pivotal Labs

Test Driven Development

Set Schedule

@nerdneha
#furtherpairingtogether
#qconsf

Weekly schedule = Weekly iterations & feedback

The big picture at Pivotal Labs

Test Driven Development

Set Schedule

Retros &
Feedback

@nerdneha
#furtherpairingtogether
#qconsf

**“All life is an
experiment.
The more experiments
you make the better”
- Ralph Waldo Emerson**

Retrospectives -- circulates feedback

Action Items

Retrospectives -- circulates feedback

Tech Retros
Parking Lot

Action Items

@nerdneha
#furtherpairingtogether
#qconsf

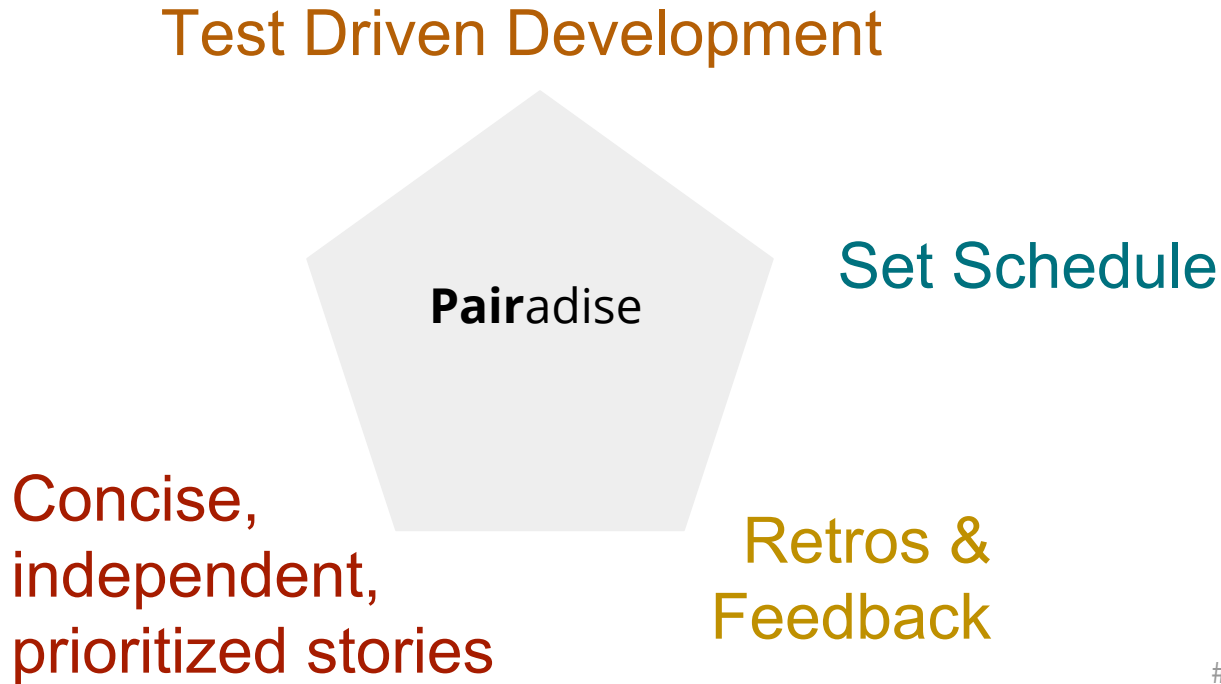

Daily Retros circulate feedback faster

How do you think it went?

I was concerned about _____, did you feel that way?

Should we try something new next time?

The big picture at Pivotal Labs

The big picture at Pivotal Labs

Test Driven Development

Few Meetings

Set Schedule

Pairadise

Concise,
independent,
prioritized stories

Retros &
Feedback

@nerdneha
#furtherpairingtogether
#qconsf

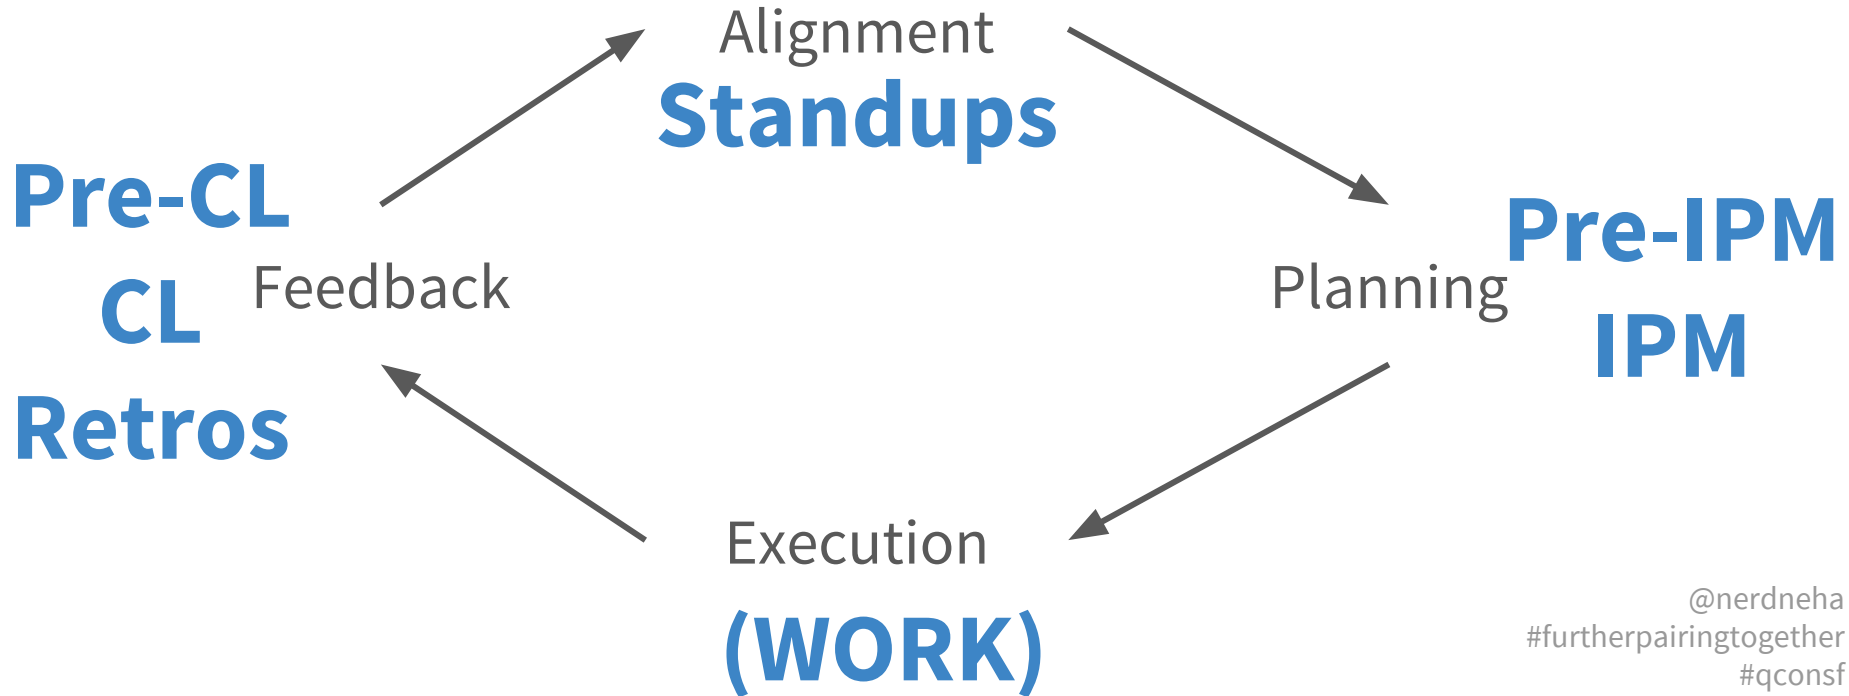

**“I love spending all my
time in meetings”**

- No one ever

**“People are happiest
when people are being
productive”**

- Rob Mee

Weekly schedule = Weekly iterations & feedback

Weekly schedule = Weekly iterations & feedback

Talk in person / record in writing = fewer meetings

Walk over to PM

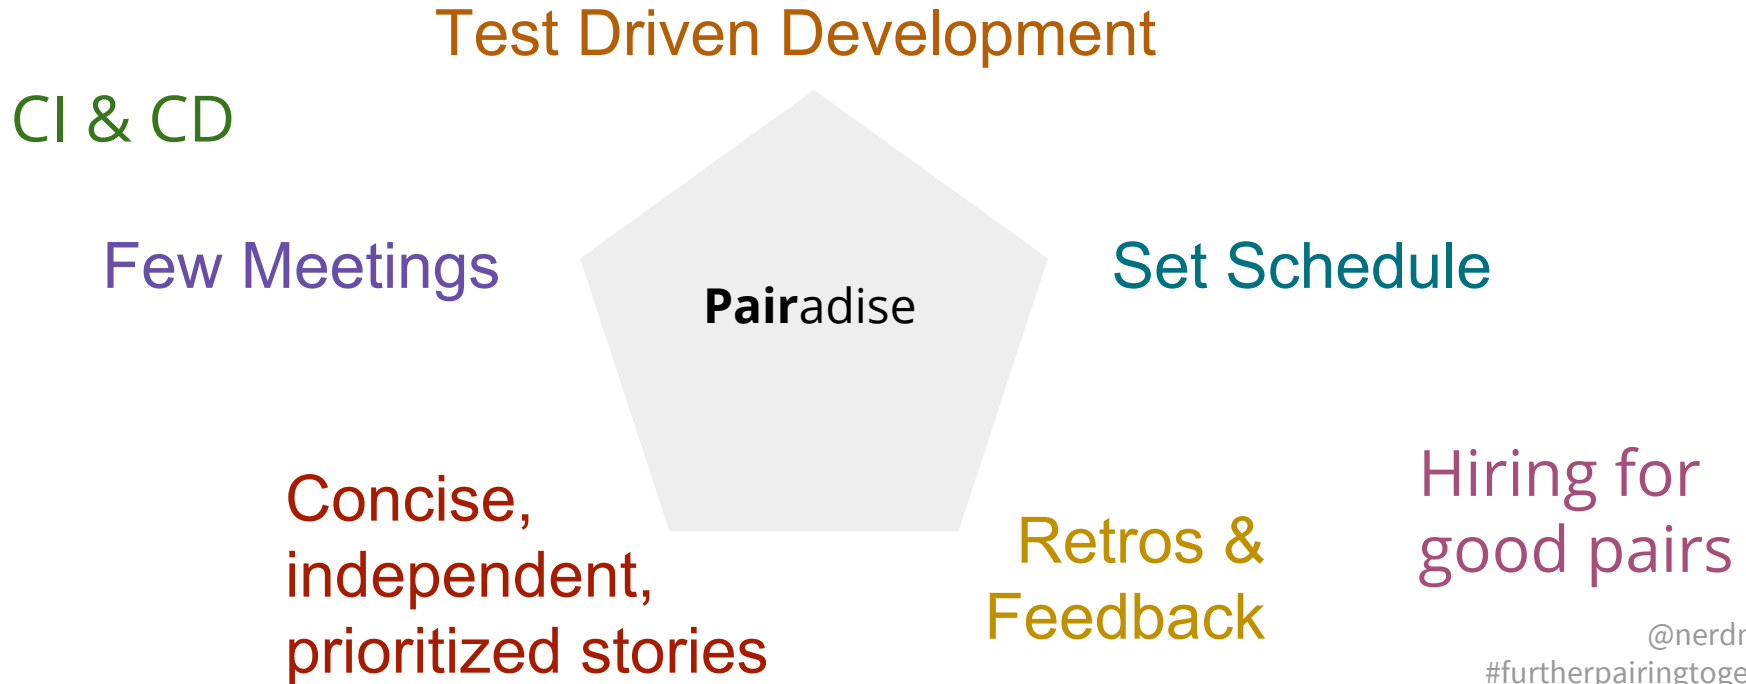

Cross functional pairing: Pair with designer or PM

Schedule check-in

Appear.in/Dedicated video

Call - Batphone

The big picture at Pivotal Labs

Goals

1. Failed Attempts
2. Pairing @ Pivotal Labs
- 3. Pair Programming & You**
4. Good times
5. War Stories
6. Lessons Learned

Best pairing conditions?

- Isolated team
- Few interruptions/meetings
- Buy-in to execute on priorities
- PM/Design resources available

How to get buy-in

- Select team with “all hands on deck” feature

Getting buy-in for Pairing:

Convince them to
“experiment” for
JUST ONE WEEK

How to get buy-in

- Select team with “all hands on deck” feature
- Introduce concept as an experiment
- Loop in product owner frequently
- Release early, often, and iterate

***Prepair.* Know the opposition**

“I’m exhausted, talking so much is tiring”

“Won’t the team move half as fast?”

“I don’t get much value out of it”

“[X activity] isn’t pair worthy”

“I don’t like the inflexible schedule”

“I’m always being watched”

“Hard to work with someone when you disagree”

“It’s the blind leading the blind”

Pairing setup hardware/software

- 1 computer, 2 monitors, 2 mice, 2 keyboards
- Mirror screens
- Increase your font
- Git duet-commit
- Good IDE
- Keycastr to see shortcut keystrokes

Remote pairing: GET GOOD HARDWARE

- Good Headphones
- Good Internet connection
- Set schedule, procedures, and expectations
- More explicit back & forth (ex: ping pong pairing)
- Check-in more
- Take time to build rapport
- Try for some in-person pairing at the beginning IF possible

The intangibles of Pairing

- Take turns - try ping-pong pairing or Timeout
- Take breaks -
 - Bonding: ping pong, cards (set)
 - Time apart: catch up on emails/personal life
- **Exp**airiment - mobbing
- Keep an open mind

**Pairing is like making a
new friend:
It's going to be awkward**

Me trying to make new friends:

**Pairing is like making a
new friend:
It's going to be awkward
so give it some time**

SORRY

Imbalanced Levels in Pairing

For the more experienced pair. You want to pair because:

- Fewer repeated questions
- Freeing you up for more complex work
- You won't be called up on vacation

For the less experienced pair. You want to pair because:

- Learn more/faster
- Get reasoning behind methods & business context

A close-up shot of the character Yoda from the Star Wars franchise. He is shown from the chest up, wearing his characteristic brown, textured robe. His green, wrinkled skin is highly detailed. He has a thoughtful or perhaps slightly smug expression, with his large, pointed ears visible. His hands are clasped together in front of him. The background is dark and out of focus.

SO

**THE STUDENT BECOMES THE
MASTER**

Goals

1. Failed Attempts
2. Pairing @ Pivotal Labs
3. Pair Programming & You
- 4. Good times**
5. War Stories
6. Lessons Learned

Good pairing looks like...

- Productivity
- Code Quality
- Project Success
 - Easy temperature on team
 - Easy to help/understand what's going on
- Happiness
- Skill growth/sharing
- Career Success

Accomplishments because of Pairing culture

- Built project in Go but don't know Go
- Learned React
- Enable clients to transition to software engineer roles
- Rapid prototyping-user testing

Goals

1. Failed Attempts
2. Pairing @ Pivotal Labs
3. Pair Programming & You
4. Good times
- 5. War Stories**
6. Lessons Learned

**STOP SHOOTING
IDIOT**

**WE ARE ON THE
SAME TEAM**

Tool chest to prevent & mitigate issues as they come up

- SWOT Analysis: what is your team's combined profile?
- Personal Goals: what do we each want out of the project?
- Inception
- Set schedule/cadence

Tool chest to prevent & mitigate issues as they come up

- SWOT Analysis: what is your team's combined profile?
- Personal Goals: what do we each want out of the project?
- Inception
- Set schedule/cadence
- Provide feedback opportunities at multiple levels
- Provide “safe haven” to get work done free from scope changes
- Have a way to collect concerns and dedicated time to discuss them

Tool chest to prevent & mitigate issues as they come up

- SWOT Analysis: what is your team's combined profile?
- Personal Goals: what do we each want out of the project?
- Inception
- Set schedule/cadence
- Provide feedback opportunities at multiple levels
- Provide “safe haven” to get work done free from scope changes
- Have a way to collect concerns and dedicated time to discuss them
- Talk in person
- Write down conversation/context
- Find a way to align first (ex: TDD + Pairing or discussing high-level)
- Daily retros

Goals

1. Failed Attempts
2. Pairing @ Pivotal Labs
3. Pair Programming & You
4. Good times
5. War Stories
- 6. Lessons Learned**

What was surprising about pairing after 1 year

Pair Programming is like making friends, it takes time

You will need an extra hour or more of sleep per night

Have patience with yourself and others

You can code/ramp up with anything now

Why does Pair Programming stick at Pivotal?

- Enablement-focused
 - Nature of our projects

Why does Pair Programming stick at Pivotal?

- Enablement-focused
 - Nature of our projects
- Shared-accountability
 - Same backlog
 - IPMs point stories but emphasis on low volatility, not high velocity
 - No silos

Why does Pair Programming stick at Pivotal?

- Enablement-focused
 - Nature of our projects
- Shared-accountability
 - Same backlog
 - IPMs point stories but emphasis on low volatility, not high velocity
 - No silos
- Empowered coworkers
 - Setting the tone during Onboarding, Inception, and through Management
 - No singling out (always as pairs that change daily)
 - “No question is stupid”
 - Empathetic coworkers
