# Payment Request API

# **Why Payment Request API?**

## **Airbnb Payments**

- An escrow service
- Moving billions of dollars per year
- 25 integrations, 191 countries, 75 currencies
- Ecosystems of all maturity levels

## Why Payment Request API?

- Mobile is 21% of e-commerce payments
- 66% of mobile purchases made on web rather than native apps
- At airbnb, conversion rate on mobile much lower than desktop

A man with a shaved head, wearing a white t-shirt, is smiling and looking upwards while holding a white container. He is standing in front of an open refrigerator filled with various items, including bottles and boxes. The scene is lit with a soft, warm glow.

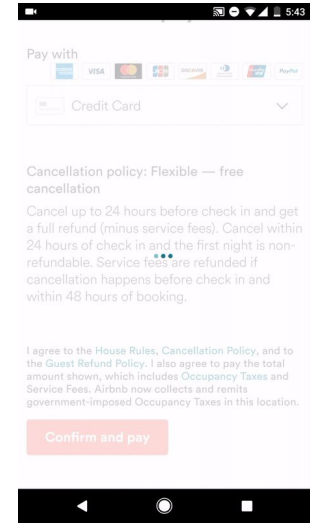

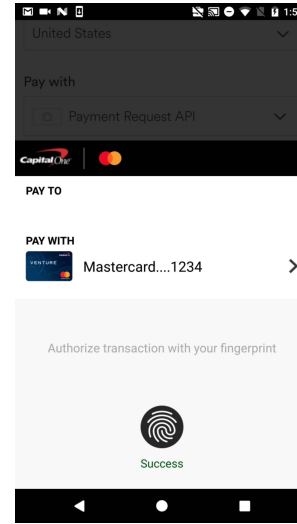

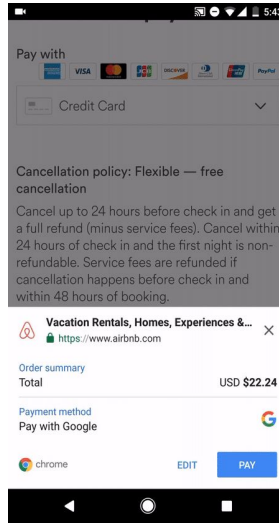

“makes checkout flows **easier, faster** and **consistent**”

## Payment Request at Airbnb

- Users can use their existing wallets
- Preferred payment methods
- Avoid custom billing form presentation
- Common infrastructure: CVV, billing address, shipping address

### Cancellation policy: Flexible — free cancellation

Cancel up to 24 hours before check in and get a full refund (minus service fees). Cancel within 24 hours of check in and the first night is non-refundable. Service fees are refunded if cancellation happens before check in and within 48 hours of booking.

I agree to the [House Rules](#), [Cancellation Policy](#), and to the [Guest Refund Policy](#). I also agree to pay the total amount shown, which includes [Occupancy Taxes](#) and [Service Fees](#). Airbnb now collects and remits government-imposed [Occupancy Taxes](#) in this location.
